

Roads & Highways
10 – 11 October 2011
A Five Star Venue To Be Announced Shortly in Kuala Lumpur, Malaysia

In a globalized economy, roads and highways is a world wide network of the transportation system in every country fuelled by rapid growth, economic interest and important socio cultural implications. Governments and developers around the world have caught on the race to mastermind, create and develop roads which creates positive value propositions and potential growth to the country's image and economic strength.

In this ever changing and challenging economy environment, customer's expectation of public services have increased as well. Roads and highways around the world are addressing important challenges and concerns about sustainable urbanism key issues to ensure that it is performing well, that government regulatory policy is appropriate and effective, that environmental and safety concerns are being duly addressed, and that benefits from investments in improved roads will be passed on to road users and the broader economy through responsive road transport services.

The marcus evans **Roads and Highways** will revolutionize innovative ideas by generating sustainable practices that is proven in the best developed roads and highways around the world. This highly-interactive and information packed event will highlight global case studies from some of the finest and at the same time provide an excellent networking platform with the public sectors, global professionals and industry leaders who are all directly and indirectly linked to the growth and development Roads and Highways

Don't miss this opportunity to meet the line up of key international speakers and to network with a very niche and targeted group of delegates from across the world.
